My opinion as a voting, citizen driver within Alaska is that the State of Alaska needs to spend available money on critical improvements to our existing transportation network before constructing controversial roads and bridges!

I do not support any proposal to spend hundreds of millions of tax dollars on mega-projects like the Knik Arm Bridge and the Juneau Road.

I do not support the delay by DOT or any cancellation of long-awaited repairs to our existing roadways in order to make room in the budget for these or any other controversial new projects!

I have seen the list of projects that have been cut or delayed at the website: <[www.aktransportation.org](http://www.aktransportation.org)> and I am not happy about this!

Please consider my opinion in further plans.
